

We are looking for an individual who can analyse and interpret the results from your data to develop logical models of your experimental system

## B: Personal Responsibility

Exercise personal responsibility in planning and implementing tasks according to prescribed protocols

### B1: Work out a methodology while knowing when to escalate appropriately and recognising limits of scope of practice.

We are looking for an individual who can plan and implement tasks according to prescribed protocols. You will be expected to demonstrate your understanding of the limits of your practice to your supervisor or others and when to escalate.

### B2: Take responsibility for safe and sustainable working practices and contribute to their evaluation and improvement.

We are looking for an individual who can take responsibility for working safely and sustainably.

### B3: Take responsibility for the quality of your work and also enable others to work to high standards.

This means that you can check how you are meeting the quality standards required for the work being carried out by you and others. You should be able to describe an example of how you enable these standards and ensure that they are met.

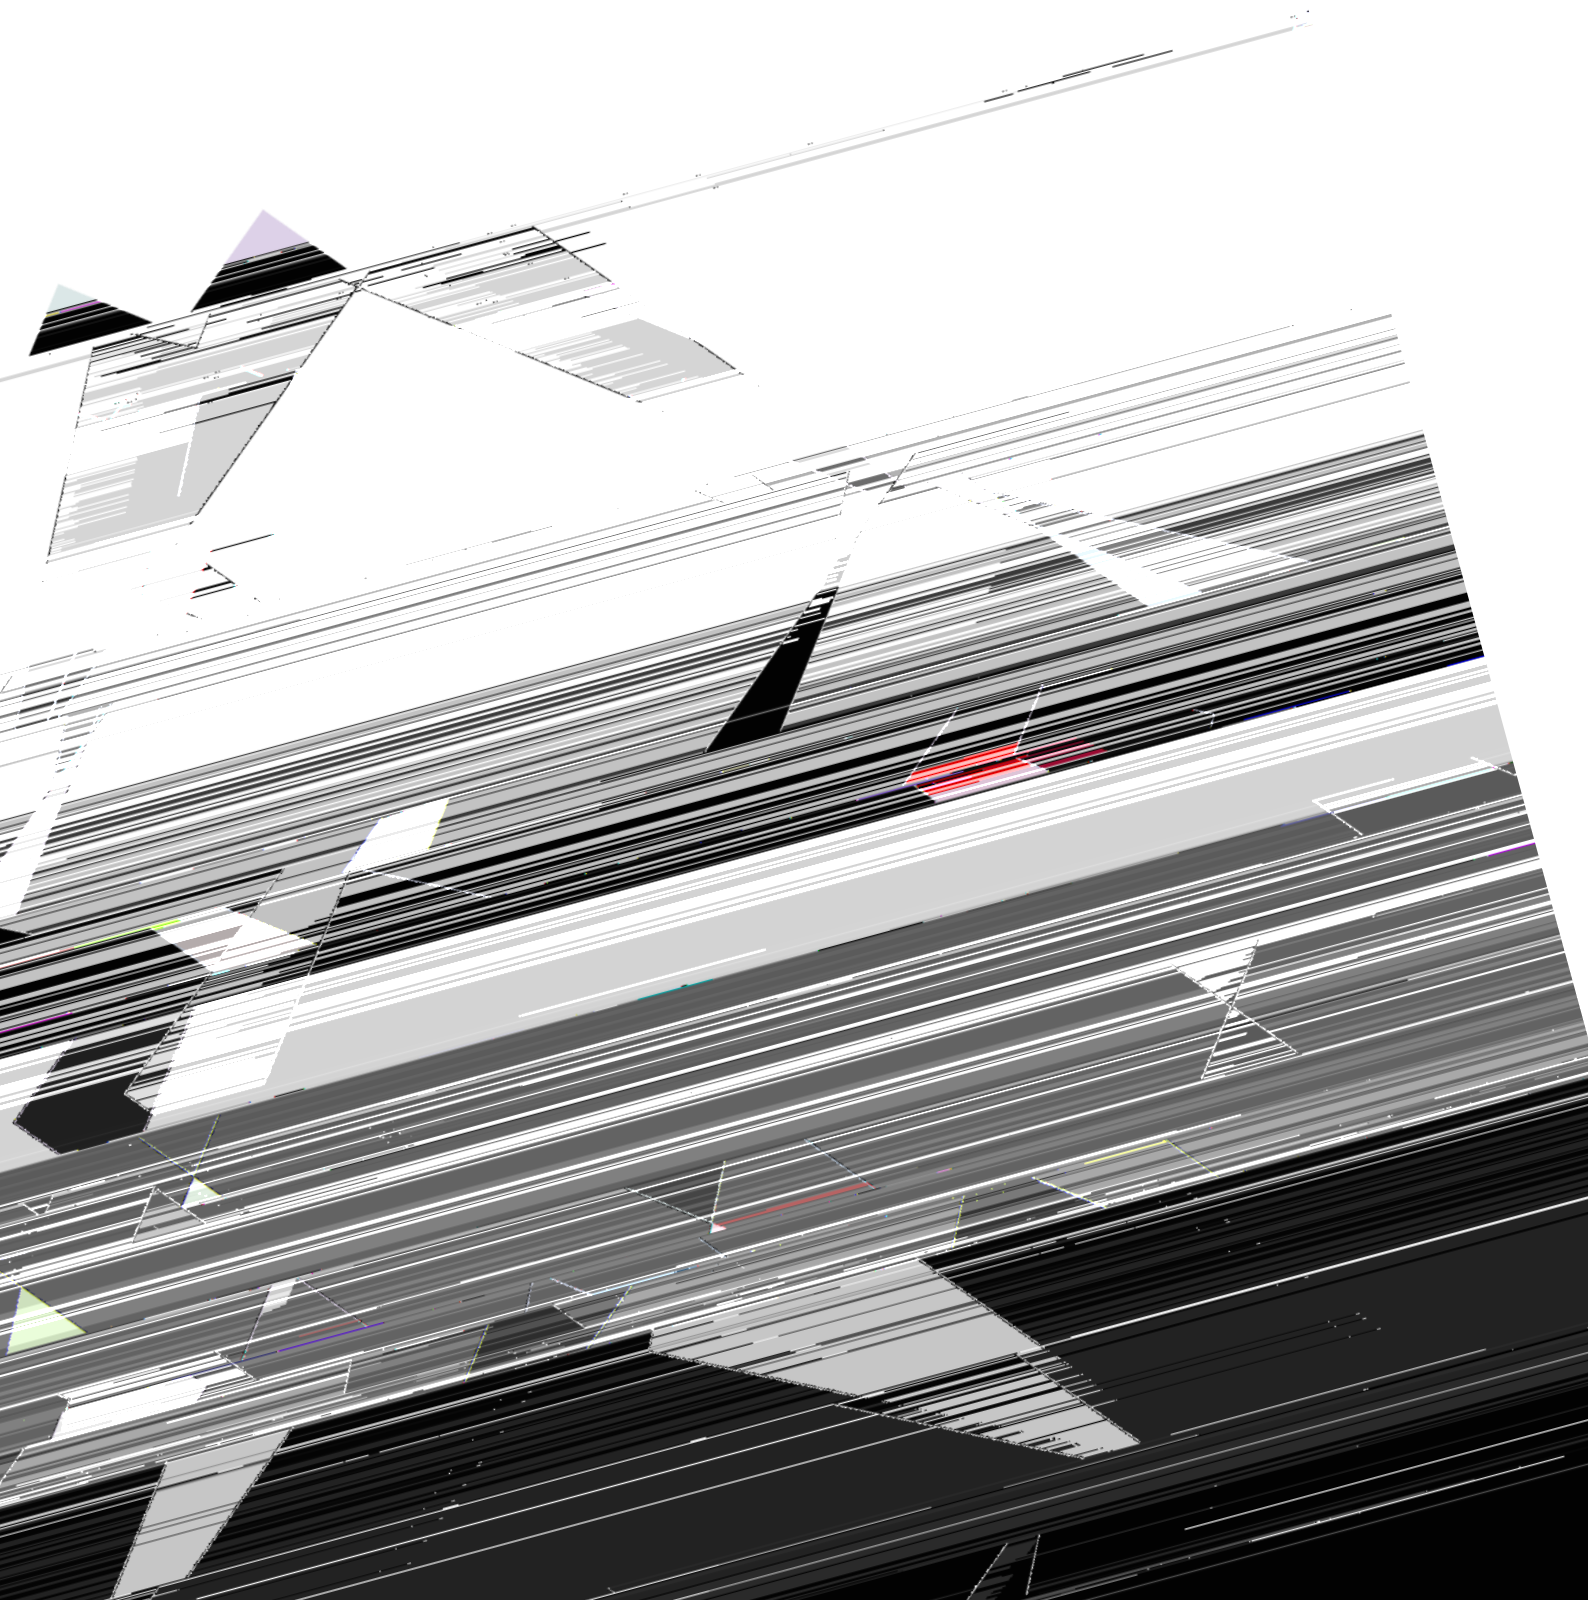

## C: Interpersonal Skills

### C1: Communicate effectively in an oral or written form using appropriate skills

What we are looking for here is an example that you are an effective communicator. The example can be through oral or written communication.

### C2: Work with others to achieve common goals, objectives and outcomes

This means that you can work with others to achieve common goals, objectives and outcomes. You should be able to describe an example of how you work with others to achieve common goals, objectives and outcomes in a work setting. In these situations it

Demonstrate a personal commitment to professional standards:

**F1: Comply with and promote relevant codes of conduct and practice.**

This means that you can sign as a member of the RSC with a code of conduct for the RSC (CPD) and you will be required to promote all relevant legislative, regulatory and local requirements.

**F2: Maintain and enhance competence in own core competencies through a programme of continuous professional development.**

The RSC is committed to the development of a culture of Continuous Professional Development (CPD) and reflect on its impact on you and others. We are not looking for a list of CPD activities or evidence of 'how you did it' but for a report of practice and of benefits to you. CPD is primarily a workplace based learning, professional activity, formal/educational, self-directed learning.

(Note registrants will need to comply with the Science Council LCPD Standards)

(Approved by Science Council Board, Sept 2020)
